1 SETUP OF THE PHONE

• MH240 SETUP PROCEDURE

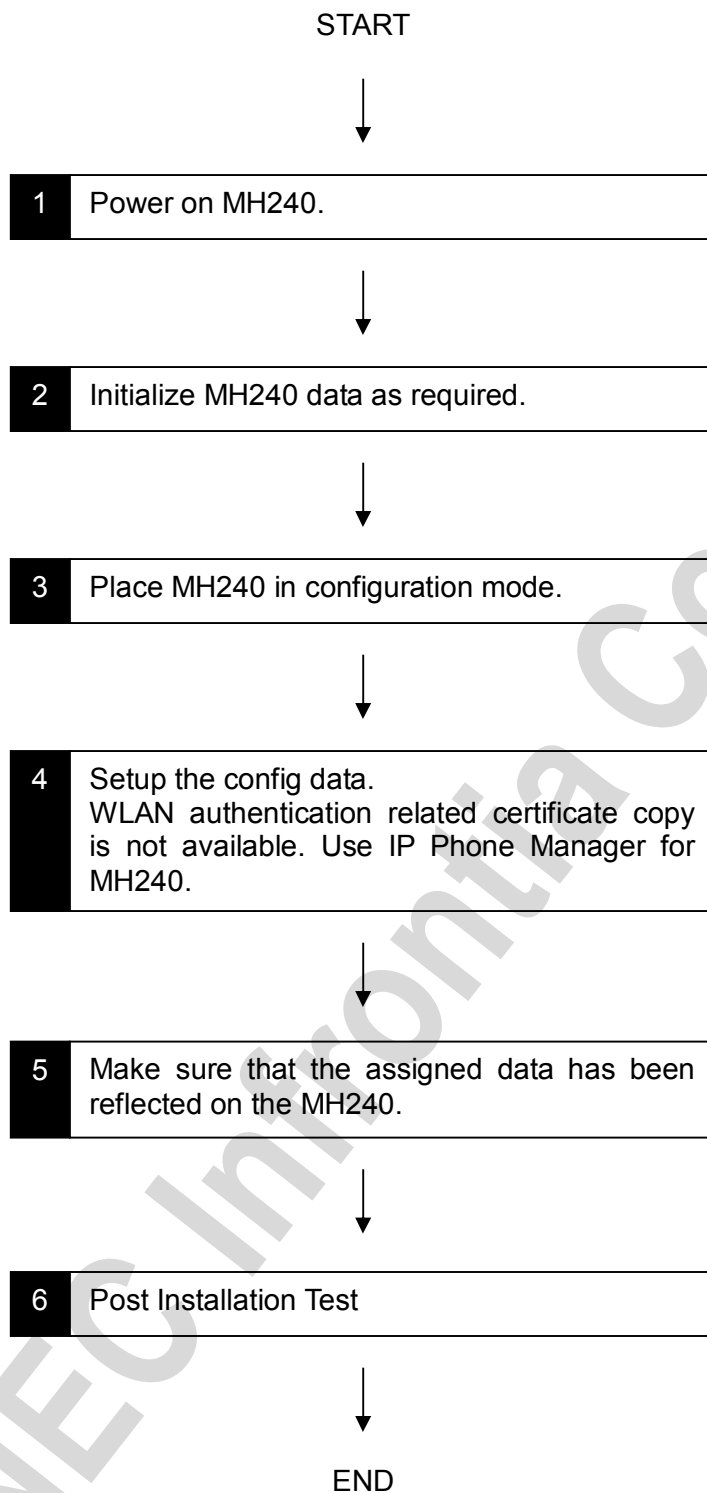

MH240 can be setup by one of the following procedures.

1. From MH240 main unit **Note**
2. Using IP Phone Manager for MH240 via USB cable
3. Using IP Phone Manager for MH240 via WLAN connection

Note: *To set certificate for WLAN authentication, be sure to use IP Phone Manager for MH240. The data can not be set from MH240.*

• SETUP FROM MH240

Follow the procedure below to setup MH240 from the phone. Be sure to change the battery before this setup procedure.

- **POWER ON MH240**

STEP1: Press and hold  key for 2 seconds or more. The start screen appears as follow.

Note: *About 30 seconds will be required for displaying the start screen.*

STEP2: The screen is placed in Standby mode.

• INITIALIZE MH240

Initialize MH240 as required. By doing this procedure, the following data will be initialized.

- Config (configuration data)
- Directory
- Call History
- Speed Dial / Preset Dial
- Date & Time
- Password

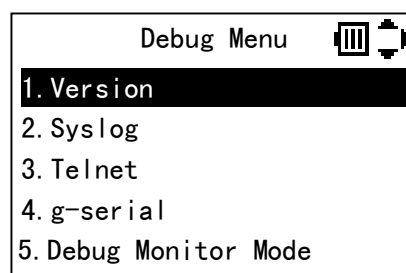

STEP1: Press  key in Standby mode to display the main menu.

STEP2: Press    to go to “1.Config” menu.

STEP3: Press     and hold for 1 second or more about each key.

STEP4: Press   to initialize the phone.

Note: The phone will automatically reboot.

• PLACE THE PHONE IN CONFIG MODE

To set administrator-related data such as Network, WLAN and SIP data, place the phone in Config mode. Config Password entry is required to do this.

STEP1: Press  key in Standby mode to display the main menu.

STEP2: Press    to go to "1.Config" menu.

STEP3: Enter Config Password (4 digits) to view "1.Config" menu.

Note: When the phone has been initialized, please enter new Config Password.

• WIRELESS SETTINGS

This section explains the wireless data for the phone. The following items are covered here.

- Set the Profile Name
- Set the ESSID (Manual)
- Set the ESSID (AP Scan)
- Set the Security (OPEN)
- Set the Security (WEP)
- Set the Security (WPA-PSK)
- Set the Security (WPA2-PSK)
- Set the Security (WPA)
- Set the Security (WPA2)
- Set the DHCP (IP)
- Set the IP Address (Required when Selecting Fixed IP)
- Set the Net Mask (Required when Selecting Fixed IP)
- Set the Gateway (Required when Selecting Fixed IP)
- Set the DNS Primary (Required when Selecting Fixed IP)
- Set the DNS Secondary (Required when Selecting Fixed IP)
- Set the Handover List

Set the Profile Name:

Factory Default: 1.DEFAULT (2 to 9 are blank)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press to view Profile Select menu.

STEP3: Press key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press to go to Profile Name edit screen.

STEP5: Edit Profile Name you want and then press “OK” soft key.

STEP6: Press to save.

Set the ESSID (Manual):

Factory Default: default (1.DEFAULT)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press **↓** key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press **1** **ABC 2** **1** to go to ESSID edit screen.

STEP5: Edit ESSID you want to connect and then press “OK” soft key.

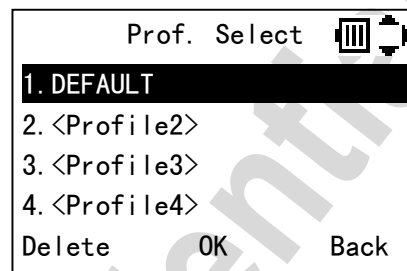

STEP6: Press **⏮** **ABC 2** to save.

Set the ESSID (AP Scan):

Factory Default: default (1.DEFAULT)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press **1** **ABC 2** **ABC 2** to scan AP and then view Scanned ESSID list.

STEP5: Press key to select ESSID you want to connect and then press “OK” soft key.

STEP6: Press **ABC 2** to save.

Set the Security (OPEN):

Factory Default: OPEN

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to view Profile Select menu.

STEP3: Press  key to select a profile you want to set security and then press “OK” soft key.

STEP4: Press   to go to Security setting screen.

STEP5: Press  key to select “OPEN” and then press  key.

STEP6: Press   to save.

Set the Security (WEP):

Factory Default: OPEN

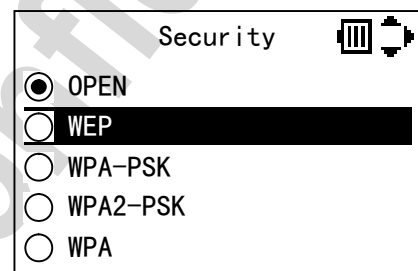

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press key to select a profile you want to set security and then press “OK” soft key.

STEP4: Press **1** **DEF 3** to go to Security setting screen.

STEP5: Press key to select “WEP” and then press key.

STEP6: Press **1** to go to Key Index setting screen.

STEP7: Press key to select a Key Index and then press “OK” soft key.

STEP8: Press **ABC 2** to go to WEP Key edit screen.

STEP9: Edit WEP Key (HEX or ASCII) and then press “OK” soft key.

STEP10: Press **ABC 2** to save.

Set the Security (WPA-PSK):

Factory Default: OPEN

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press  key to select a profile you want to set security and then press “OK” soft key.

STEP4: Press **1** **DEF 3** to go to Security setting screen.

STEP5: Press  key to select “WPA-PSK” and then press  key.

STEP6: Press  key to select an encryption “1.TKIP” or “2.AES” and then press  key.

STEP7: Edit TKIP or AES Key (ASCII) and then press “OK” soft key.

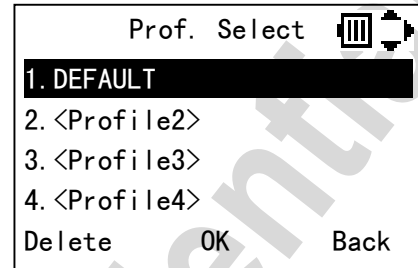

STEP8: Press  **ABC 2** to save.

Set the Security (WPA2-PSK):

Factory Default: OPEN

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press  key to select a profile you want to set security and then press “OK” soft key.

STEP4: Press **1** **DEF 3** to go to Security setting screen.

STEP5: Press  key to select “WPA2-PSK” and then press  key.

STEP6: Press  key to select an encryption “1.TKIP” or “2.AES” and then press  key.

STEP7: Edit TKIP or AES Key (ASCII) and then press “OK” soft key.

STEP8: Press  **ABG 2** to save.

Set the Security (WPA):

Factory Default: OPEN

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press key to select a profile you want to set security and then press “OK” soft key.

STEP4: Press **1** **DEF 3** to go to Security setting screen.

STEP5: Press key to select “WPA” and then press key.

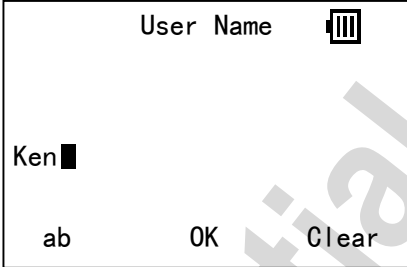

STEP6: Press key to select an encryption “1.TKIP” or “2.AES” and then press key.

STEP7: Press **1** **DEF 3** to set EAP type to PEAP.

STEP8: Press  to go to User Name edit screen.

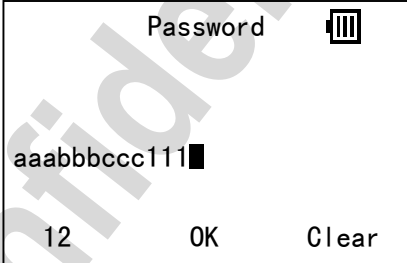

User Name 

Ken 

ab OK Clear

STEP9: Edit User Name and then press “OK” soft key.

STEP10: Press  to go Password edit screen.

Password 

aaabbbccc111 

12 OK Clear

STEP11: Edit Password and then press “OK” soft key.

STEP12: Press   to save.

NOTE: If you want to set TLS as EAP type, please use IP Phone Manager for MH240.

Set the Security (WPA2):

Factory Default: OPEN

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press  key to select a profile you want to set security and then press “OK” soft key.

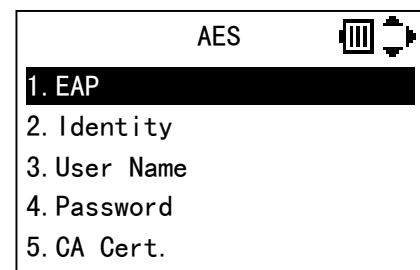

STEP4: Press **1** **DEF 3** to go to Security setting screen.

STEP5: Press  key to select “WPA2” and then press  key.

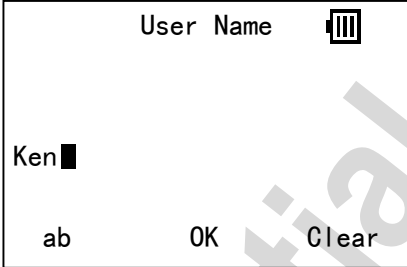

STEP6: Press  key to select an encryption “1.TKIP” or “2.AES” and then press  key.

STEP7: Press **1** **DEF 3** to set EAP type to PEAP.

STEP8: Press  to go to User Name edit screen.

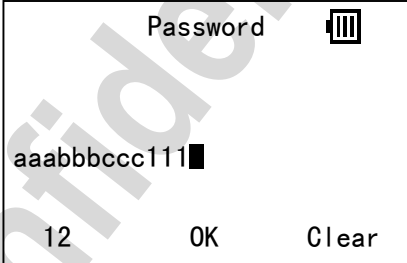

User Name 

Ken 

ab OK Clear

STEP9: Edit User Name and then press “OK” soft key.

STEP10: Press  to go Password edit screen.

Password 

aaabbbccc111 

12 OK Clear

STEP11: Edit Password and then press “OK” soft key.

STEP12: Press   to save.

NOTE: If you want to set TLS as EAP type, please use IP Phone Manager for MH240.

Set the DHCP (IP):

Factory Default: Fixed IP

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to view Profile Select menu.

STEP3: Press  key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press   to enable DHCP.

STEP5: Press      to save.

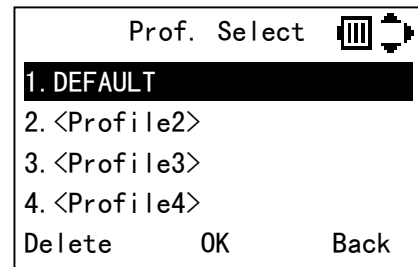

STEP6: Press  to return to Standby mode.

Set the IP Address:

Factory Default: 172.16.1.240 (1.DEFAULT)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to view Profile Select menu.

STEP3: Press  key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press    to go to IP Address edit screen.

STEP5: Edit IP Address you want and then press “OK” soft key.

STEP6: Press   to save.

Set the Net Mask:

Factory Default: 255.255.0.0 (1.DEFAULT)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to view Profile Select menu.

STEP3: Press  key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press    to go to Net Mask edit screen.

STEP5: Edit Net Mask you want and then press “OK” soft key.

STEP6: Press   to save.

Set the Gateway:

Factory Default: -

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press **↓** key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press **ABC 2** **1** **DEF 3** to go to Gateway edit screen.

STEP5: Edit Gateway you want and then press “OK” soft key.

STEP6: Press **⏏** **ABC 2** to save.

Set the DNS Primary:

Factory Default: -

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to view Profile Select menu.

STEP3: Press  key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press    to go to DNS Primary edit screen.

STEP5: Edit DNS Primary you want and then press “OK” soft key.

STEP6: Press   to save.

Set the DNS Secondary:

Factory Default: -

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **1** **1** to view Profile Select menu.

STEP3: Press **Enter** key to select a profile you want to edit and then press “OK” soft key.

STEP4: Press **ABC 2** **1** **JUL 5** to go to DNS Secondary edit screen.

STEP5: Edit DNS Secondary you want and then press “OK” soft key.

STEP6: Press **Red Phone** **ABC 2** to save.

Set the Handover List:

Factory Default: DEFAULT

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to view Handover List.

STEP3: Press  key to select a profile area you want and then press “OK” soft key.

STEP4: Press “OK” soft key to view profile list.

STEP5: Press  key to select a profile you want to add and then press “Save” soft key.

STEP6: Press   to save.

• SIP SETTINGS

This section explains the SIP data for the phone. The following items are covered here.

- Set the DHCP (SIP)
- Set the SIP Proxy
- Set the SIP Port
- Set the Register
- Set the Register Port
- Set the User ID
- Set the User Password
- Set the Phone No.

Set the DHCP (SIP):

Factory Default: Disable

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **ABC 2** **1** **1** to go to DHCP (SIP) menu.

STEP3: Press **ABC 2** to enable DHCP (SIP).

STEP4: Press **[Red Phone Icon]** **ABC 2** to save.

NOTE: This feature will not work well without DHCP Server supporting SIP option.

Set the SIP Proxy:

Factory Default: 172.16.0.10 (SIP Proxy1)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **ABC 2** **1** **ABC 2** to go to SIP Proxy1 edit screen.

STEP3: Edit SIP Proxy (IP Address or FQDN) and then press “OK” soft key.

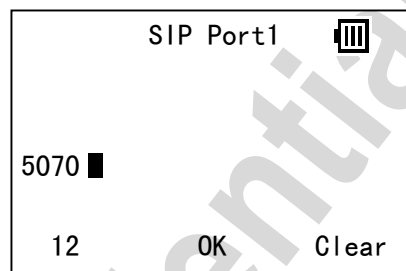

STEP4: Press **[Red Phone Icon]** **ABC 2** to save.

Set the SIP Port:

Factory Default: 5070 (SIP Port1)

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **ABC 2** **1** **DEF 3** to go to SIP Port1 edit screen.

SIP Port1

5070

12 OK Clear

STEP3: Edit SIP Port and then press “OK” soft key.

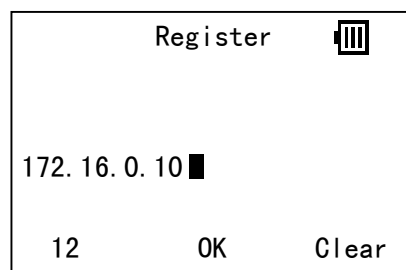

STEP4: Press **Red Phone** **ABC 2** to save.

Set the Register:

Factory Default: 172.16.0.10

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **ABC 2** **ABC 2** to go to Register edit screen.

Register

172. 16. 0. 10

12 OK Clear

STEP3: Edit Register (IP Address or FQDN) and then press “OK” soft key.

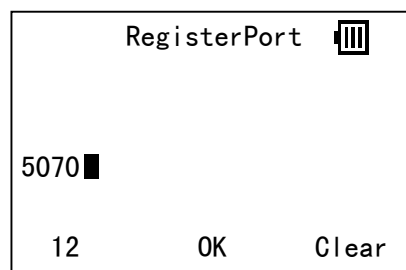

STEP4: Press **Red Phone** **ABC 2** to save.

Set the Register Port:

Factory Default: 5070

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press **ABC 2** **DEF 3** to go to Register Port edit screen.

RegisterPort

5070

12 OK Clear

STEP3: Edit Register Port and then press “OK” soft key.

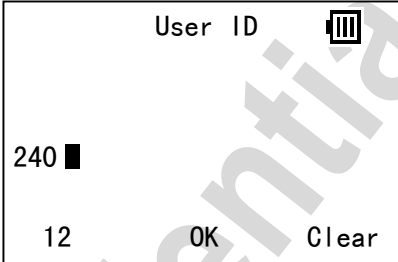

STEP4: Press **Red Phone** **ABC 2** to save.

Set the User ID:

Factory Default: 240

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to go to User ID edit screen.

The screenshot shows the 'User ID' edit screen. At the top right is a title bar with 'User ID' and a menu icon. The main display area shows '240' followed by a cursor bar. At the bottom, there are three soft keys: '12', 'OK', and 'Clear'.

STEP3: Edit User ID and then press “OK” soft key.

STEP4: Press   to save.

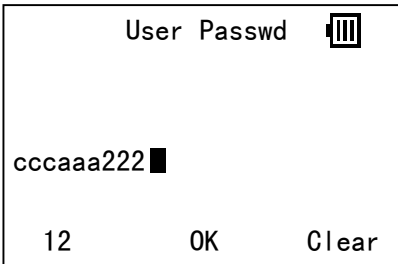

NOTE: User ID you set will be copied to Phone No automatically.

Set the User Password:

Factory Default: -

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to go to User Password edit screen.

The screenshot shows the 'User Passwd' edit screen. At the top right is a title bar with 'User Passwd' and a menu icon. The main display area shows 'ccccaa222' followed by a cursor bar. At the bottom, there are three soft keys: '12', 'OK', and 'Clear'.

STEP3: Edit User Password and then press “OK” soft key.

STEP4: Press   to save.

Set the Phone No.:

Factory Default: 240

STEP1: Go to “Config” menu. (See “PLACE THE PHONE IN CONFIG MODE”)

STEP2: Press   to go to Phone No. edit screen.

STEP3: Edit Phone No. and then press “OK” soft key.

STEP4: Press   to save.

NOTE: Phone No. you set will be displayed in Standby mode screen.

• CONFIG PASSWORD SETTINGS

This section explains the Config Password for the phone. The following items are covered here.

- Set the New Config Password
- Change the Config Password

Set the New Config Password:

STEP1: Press    to go to New Config Password edit screen.

Password		
New Password:		
12	OK	0000 Clear

STEP2: Edit New Config Password (4 digits) and then press “OK” soft key.

STEP3: Press  to return to Standby mode.

NOTE: This procedure is available only when MH240 has been initialized.

Change the Config Password:

STEP1: Go to “Config” menu. ([See “PLACE THE PHONE IN CONFIG MODE”](#))

STEP2: Press  to go to Old Password confirmation screen.

Password		
Old Password:		
12	OK	**** Clear

STEP3: Enter current Config Password and then press “OK” soft key.

Password		
New Password:		
12	OK	9999 Clear

STEP4: Enter New Config Password and then Press “OK” soft key.

STEP5: Press  to return to Standby mode.

This page is for your notes.

3. TROUBLE SHOOTING

• MESSAGE MEANINGS AND SUGGESTIONS

The following shows the meanings and suggestions of messages that may be displayed on your phone.

Message	Meaning & Suggestion
[Password] Unauthorized!	The entered password is not correct. Enter the correct password.
[Low Battery] Please charge it	Battery charge level is low. Charge the battery.
[Directory] No Input Name	You do not edit Name of Directory. Edit Name.
[Directory] Directory is Full	The number of entries reaches the maximum. To add new entry, delete some entries in advance.
[Handy KeyLock] Handy KeyLock Enabled	Displayed when your phone is locked.
[Handy KeyLock] Handy KeyLock Disabled	Displayed when your phone is unlocked.
[Password Lock] PASSWORD Lock Enabled	Displayed when your phone is locked with password.
[Setting] X to Y is input	Entered value is out of range. Enter the value of X to Y.

• TROUBLES AND SUGGESTIONS

The following shows suggestions on how to resolve MH240 operation problems. Confirm the following before making a call:

- ✓ Is power ON?
- ✓ Is battery charged?
- ✓ Is Antenna icon () displayed?

Symptom	Suggestion
Can not power on the phone...	<ul style="list-style-type: none"> - Press  key and hold more than 2 seconds. - Insert the battery to your phone properly. - Charge the battery.
Can not operate keys on the phone...	<ul style="list-style-type: none"> - Unlock your phone if lock icon () is displayed. - Unlock your phone if "Handy KeyLock" is displayed.
Communication is lost, audio break-up occurs...	<ul style="list-style-type: none"> - Check the receiving signal strength. - Check the battery when  is indicated. - Apart your phone more than 50cm from Access Point.
Can not see Antenna Icon ()...	<ul style="list-style-type: none"> - When you are in area where sufficient signal can not be obtain, move to other area. - SIP server registration is uncompleted. If this occurs, please contact your network administrator.
Can not sustain battery power...	<ul style="list-style-type: none"> - Insert the battery to your phone properly. - Place the battery on the proper position of your cradle. - Replace the battery.
Can not make or receive a call...	<ul style="list-style-type: none"> - Make sure that phone number of your phone. To change the phone number, please contact your network administrator.
The phone does not ring...	<ul style="list-style-type: none"> - When your phone is placed in courtesy mode, cancel it. Courtesy icon () appears when your phone is in this mode. - Check ring volume and adjust except "Off".

4. SPECIFICATIONS

• TECHNICAL SPECIFICATIONS

The following shows the technical specifications of MH240.

Item	Specifications
Wireless Interface	IEEE802.11b/g
Codec	G.711, G.729a, Payload Size: 20 to 80 ms
Control Protocol	SIP (RFC3261), NEC Enhanced SIP
Authentication	IEEE802.1x (EAP-TLS, PEAP)
Encryption	WEP (64 bit / 128 bit), TKIP, AES
LCD	Monochrome LCD, 120 × 90 pixels
Main Feature	Call History, Directory, Speed Dial, Courtesy Mode
Ringer	Ring Tone : selectable from 16 kinds Ring Volume : selectable from 5 levels
Battery	Lithium Ion Battery, 3.7 V - 850 mAh
Battery Life	Talk Time : up to 3 hours Standby Time : up to 90 hours
AC Adapter	INPUT : AC 100 V to 120 V, 50/60 Hz, 0.3 A OUTPUT : DC 5 V, 1 A DC Plug : miniUSB (typeB) plug
Operation Temperature	0 to 35 °C
Operating Humidity	10 to 90 %
Dimension	135.0 × 48.0 × 17.6 mm
Weight	94.36 g
Certification and Compliance	CSA60950-1 FCC Part 15 Class B RSS-210 HAC
